We would like to invite all the representatives of social, humanistic, technical, medical, economic sciences - representatives of theory and practice to take part in our joint undertaking which determines the actual state and development prospects for industry 4.0. both in Poland and abroad.

The aim of every conference organized in this series is creating the opportunity to present research results, establish interdisciplinary collaboration, exchange the ideas of researchers who are interested in the social and technological changes taking place in the modern world. We regard integrating both the Polish and European scientists, a system of solutions that have been jointly worked out and the interdisciplinarity of problems as the only good direction of science development.

We are glad that we can present scientific results of our action. We would like to thank you for all applications and ideas which we can discuss together during our meeting.
