

Specific objectives for enhancing research collaboration with research institutions of high international reputation, especially in priority research areas.

- ▲ Active participation in international associations of universities, collaboration networks and scientific societies
- ▲ Establishing a network with foreign research universities and acting as a bridge between universities in Western Europe and Central and Eastern Europe
- ▲ Increasing the percentage of scientific publications in collaboration with the best research institutions
- ▲ Acting as a leader of a consortium or a partner in international projects, especially Horizon and ERC
- ▲ Increase in the number of scientific internships, in particular long-term internships, in the best foreign institutions
- ▲ Increasing the mobility of employees and doctoral students in order to establish collaboration and undertake research with leading research institutions
- ▲ Increasing the percentage of double doctorates conducted together with research universities
- ▲ Increasing the number of prestigious, international congresses and scientific meetings, organized at the University in order to increase the visibility of employees and the University itself as well as to present the University's potential
- ▲ Using all possibilities followed from approximately 250 international collaboration agreements already concluded with specific universities and industrial partners
- ▲ Changing the practice of concluding agreements from general letters of intent into agreements containing detailed tasks together with the schedule for their implementation
- ▲ Promoting the University, its offer and achievements in the international environment
- ▲ Taking the best practices from other leading research universities
